EYEZEN™+ LENSES

More than **90%**
of adults are at risk for
digital eye strain¹

Everyone deserves the most comfortable vision possible. That's why *Eyezen+* lenses help reduce eye strain—to keep you going and get the most out of your screen life.

Eyezen+ lenses are an enhanced, everyday pair of single vision lenses that are a more complete solution to modern vision problems. *Eyezen+* lenses have two main benefits over ordinary single vision lenses:

- Help defend against digital eye strain**
- Reduce exposure to Harmful Blue Light

DIGITAL EYE STRAIN

Digital eye strain is defined as the **physical eye discomfort** felt after two or more hours in front of a digital screen. It originates from the overexertion of certain muscles that help your eyes focus.

HARMFUL BLUE LIGHT

Harmful Blue Light is all around you, due to the increasing use of devices and new lighting technologies inside and sunlight outside. Harmful Blue Light is one of many risk factors such as age, genetics, diet, lifestyle, and occupation, that may contribute to age-related macular degeneration (AMD). AMD is a leading cause of severe vision loss and blindness in adults over the age of 60.
