# SightPROTECT™

— BY EssilorLuxottica —

## INTRODUCING SightPROTECT™

Essilor's new prescription safety eyewear program is designed to reduce complexity and modernize safety eyewear through online program management as well as flexibility through a large network of leading independent eyecare professionals, local retail providers and online options.

**The Occupational Safety and Health Administration (OSHA) reports that workplace eye injuries cost an estimated $300 million a year in lost productivity, medical treatment and worker compensation.[1] However, over 90 percent of all workplace eye injuries could be avoided by using proper safety eyewear.[2] SightProtect™ *can help keep your employees safe!***

## Seamless, Easy to Manage Program:

- **100% electronic management** of the program, eliminating the need for paper order forms that were previously lost or destroyed
- Online management of the employee database allows for complete control over eligibility, additions, removals, utilization and program billing visibility
- Enhanced member experience for employees including a real time provider locator, online frame catalog and digital ID cards

## Expanded Provider Options:

- Nationwide network of more than **4,000 access points**, including leading independent eyecare professionals such as Vision Source providers, as well as LensCrafters and Target Optical retail locations, and online providers
- Ensures your employees have the flexibility to get their prescription safety eyewear when and where they want, including nights and weekends
- Eliminates the frustration your employees may have faced in the past of visiting a provider only to find the office is closed or no longer participating in the program

## Improved Accuracy and Turnaround Time:

- Eyecare providers will enter orders electronically into the online portal in real time, improving the accuracy of data and trackability, resulting in **fewer errors and delays**
- Online business-specific frame management offers providers real time inventory visibility so that backordered or out of stock frames cannot be ordered, further improving the turnaround time and experience for your employees

## Upgraded Frame Assortment:

- A curated collection of frames focusing on fit, functionality, and style from leading prescription safety eyewear manufacturers such as **Oakley®, Wiley X® and more**
- All providers will be equipped with an up-to-date frame samples kit, ensuring your employees have **access to a robust selection** of 36 to 45* of the most current frame styles

## Safety Certified Lab Network and Products:

- All *SightProtect* products (frames and lenses) meet the requirements of the current ANSI/ISEA Z87.1-2020 Standard as enforced by OSHA

*For more information on SightProtect, visit **sight-protect.com** or email us at **sightprotectclient@essilorusa.com***

essilor

*Target Optical will have a limited frame selection.
